SKILLS

- Problem-Solving & Critical Thinking
- Software Development
- Project Management & Team Collaboration
- Adaptability & Continuous Learning
- Communication & Leadership
- QA-(Quality Assurance)

LANGUAGES

- Hebrew | Advanced
- English | Advanced
- Arabic | Native

SUMMARY

I'm a highly motivated third-year Software Engineering student with hands-on experience in C, Java, Python, Assembly, and SQL, supported by a solid foundation in algorithms, data structures, and system-level programming. Through real-world academic projects, I developed strong capabilities in database design, modular software architecture, and performance-driven systems engineering. I've worked with hybrid cloud infrastructure, IoT technologies, and real-time data processing environments.

Additionally, I've completed a comprehensive course in Quality Assurance (QA), gaining practical experience in manual testing, test case development, bug tracking, and software quality control lifecycle methodologies. I also have working knowledge of front-end web development using HTML, CSS, and JavaScript, allowing me to build and prototype responsive user interfaces.

I bring a solution-oriented mindset, technical versatility, and a strong passion for building reliable, scalable, and user-centric software systems, with an eagerness to grow in dynamic, team-oriented environments.

EDUCATION

82

Kinneret College. Kinneret | 2023 - Present

Gained hands-on experience through a wide range of software engineering courses, including C, Java, Python, and Assembly, with a strong focus on algorithms, data structures, and system-level programming. Developed a solid foundation in Database Management Systems (SQL) and Object-Oriented Programming, supported by coursework in Introduction to Software Programming and Software-Intensive Systems Engineering.

Built practical skills in Quality Assurance (QA) through structured training in manual testing, test case design, and software quality control. Gained basic front-end knowledge in HTML, CSS, and JavaScript, allowing for low-level full-stack development and UI prototyping.

PROJECTS

Wine Data Analysis Application 2024

Smart Fuel Station Management System (SMN) 2025

FixPhone SQL Repair Shop Database 2025

Personal Web Portfolio 2024
